

REACH X END EFFECTORS

Versatile, swappable tooling can be configured to match your operation requirements.

GRAB, INSPECT, REPAIR, RECOVER

RX PARALLEL JAWS | 14-5020

Parallel plates give these jaws a predictable and consistent grip for tasks such as valve actuation or third-party tool handling.

- Length: 77mm (pivot to tip)
- Max Opening: 60mm
- 25x50mm jaw plates

RX INTERLOCK JAWS | 14-5010

A four-pronged gripper capable of a wide range of object recovery and remote intervention tasks.

- Length: 72mm (pivot to tip)
- Max Opening: 115mm
- Serrated inner for secure grip

RX CUTTER | 14-5030

A high-force cutter designed for versatile tasks such as severing tangled lines, ropes and copper cables.

- Max Cutting Ø: 20mm
- Replaceable blade insert

MISSION SPECIFIC TOOLING

Reach X electric manipulators are the most versatile tool for portable ROVs. Interchangeable end effector tooling enables operators to quickly configure their grabber or manipulator in-field for the required task. The range of available end effectors have been specifically developed to tackle common underwater intervention applications including, but not limited to:

- Handling third-party inspection tools
- Object recovery
- Severing lines and cables
- Screwing bolts
- Operating ball and globe valves
- Sediment sampling

Supported by seven years of R&D and operator feedback cycles, the Reach X end effector range is expanding to include popular variants we have developed for past manipulator series.

Proven on industry leading ROVs

A rapid swap-out procedure ensures interchangeability on the go.
